Welcome Address

Dear Colleagues,

On behalf of the Organising Committee, it is a great pleasure to welcome to the **8th Congress of the European Operating Room Nurses Association (EORNA)**, held in Rhodes island – Greece from the **4th** to the **7th** of **May 2017**.

This is a great moment bringing together all committed nurses, leaders and perioperative professionals.

The scientific program offers delegates a wide range of innovative and interesting topics, with oral presentations, poster sessions and workshops. This congress is an excellent opportunity to enhance and strengthen your knowledge for improving perioperative care. During this congress you will also share knowledge and experience with colleagues from over 40 countries.

Greece is famous for being the cradle of Western civilization. Greek culture, had a powerful influence on our history and our world especially in philosophy, art and science.

Greece is also the country of Hippocrates, the physician considered as one of the most outstanding figures in the history of medicine and as the "father of western medicine".

Today, in our profession, we use many medical terms that derive from Ancient Greek.

Rhodes is famous worldwide for the "Colossus of Rhodes», one of the Seven Wonders of the Ancient World. Rhodes, located between the West and the East became an important meeting point of various civilizations, cultures and religions.

The congress theme is: The Colossus of perioperative nursing. If you describe someone as a colossus, you mean that he is extremely important and great in ability. We, perioperative nurses, are "the colossus" to provide the best, the more secure perioperative care to the patient.

The Colossus of Rhodes was a symbol of peace and unity for the people who were living in the beautiful Mediterranean island of Rhodes. In perioperative nursing practice, we do not work alone, but as a team. In a united team, we communicate, we have common goals. Teamwork is more than just working together, it is bringing out the best of everyone's strengths, the key in ensuring quality perioperative care.

We trust this will be a very fruitful congress for everyone!

SUZY KIMPEN

Magic is something you make

My name is Suzy Kimpen (45 year) and I've been working in operating rooms for more than 20 years. During my professional journey as a RN, a transplantation coordinator, a teacher, a staff member and a coach/consultant I've met the most beautiful people and professionals. I've been given opportunities in teaching, mentoring and professional growth. In 2006 I've read this life changing article written by Prof. David Cooperidder and Prof. Suresh Srivastava about Appreciative Inquiry.

Realizing that there was another way of looking at life felt like a big relief! Since that moment I've been studying Appreciative Inquiry not only to become an expert in this field but to find a way to help my colleagues in healthcare to change the way they look at their beautiful jobs.

In 2011 my thirst for knowledge and training has led me to CWRU in Cleveland where I was trained by Prof. Ron Fry. In Belgium I followed CIGO and I continue to expand my knowledge and I hope to start my PhD in the near future. Through action research I want to help healthcare professionals to take charge of their life's and find the spirit to stay focused on their own qualities and the beauty of their work. I want to dedicate my life to this work.

My motto: "I have never tried that before so I think I should definitely be able to do that!"

STALIKAS ANASTASSIOS

Anastassios Stalikas is a Professor in Psychology Department, at the Panteion University of Social and Political Sciences, Adjunct Professor at McGill University in Canada, and President of the Hellenic Society of Positive Psychology. He has authored more than 10 books, 60 chapters, and over 200 articles and papers in the international scientific community. His work centers on the role of positive emotions in the protection and enhancement of psychological and physical health. In addition to his teaching and research activities he is a psychotherapist, consultant and coach. His clinical, training and coaching work is guided by his research findings, while at the same time these same activities generate his research questions. Over the last 20 years he has been invited for talks, workshops, seminars, and courses in more than 15 countries and in four continents. He rides his bike and he plays the saxophone.
